AIR

STAY ACTIVE

“With NuDrive Air it is easy to stay active with my friends and family. I have more power to overcome inclines and distances on my own, and that is important to me. NuDrive Air has given me more freedom.”

- Jacob Dahl, Paraplegic

NuDrive Air - Stay Active

NuDrive Air Wheelchair Propulsion Lever System is an incredible aid for you, who wish to remain active in your wheelchair, but find it difficult to overcome the inclines in your surroundings. With NuDrive Air you have 50% extra power and you keep your muscles active. As an extra benefit you have in-built brakes, and you even keep your hands dry and clean holding on to the levers instead of the wheelchair rims.

Clinical evidence clearly indicates that with the NuDrive Air you can prevent yourself from having wrist- or shoulder injuries derived from many years of normal propulsion in your wheelchair. NuDrive Air is also well-suited for therapy of such injuries.

Using NuDrive Air your body postural alignment will even improve, providing increased lung ventilation and longer endurance.

Fast facts

Build-in braking system by leading mountain bike brake manufacturer.

Fits all manual wheelchairs with 20", 22", 24" and 25" inch wheels.

Snap-lock technology for instant fitting: Quick-Release.
