

INVACARE® TOP END®

Basketball Series Wheelchairs

Introducing exciting upgrades in material and design of the Paul Schulte Signature Basketball Chair. The weight was reduced by 2-3 lb. and now it is even faster and more responsive!

New Material: 7000 Aluminum reduces the overall weight of the chair by 2 lb. making it comparable in weight with titanium frames. The big advantage of 7000 aluminum is three-fold. One, the material is approximately 23% stronger than 6061 aluminum. Two, since the material is stronger, we are able to reduce the wall thickness of the aluminum tubes, reducing the overall weight. Best of all, the rigidity and strength of a 7000 aluminum frame is further enhanced by Invacare Top End's sophisticated heat treating and powder coating process.

New Design: The Top End design team has made improvements in multiple components on the Schulte Series BB chairs. The head tube design improvements utilize precision components that maximize stiffness, reduce play and improve overall responsiveness of the casters. Axle receives will now be locked onto the frame using the Nord-Lock bolt securing system. This system minimizes axle play so that a player's rear wheels are secure and solid for a confident feel. Lastly, sleek curved frame members add a sharp look to the camber tube, anti-tips and offensive wing.

Four bend wing. Compact and great for dribbling.

Round wing with round gussets for smooth turning.

Bumper/omit wing for a more defensive setup.

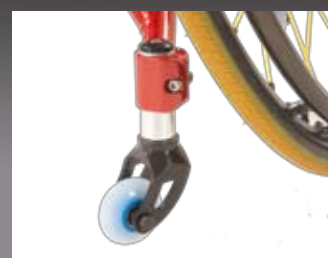

Double amputee front-end option.

Optional adjustable height double swivel anti-tip/fifth wheel.

Optional welded fixed tube sideguards ensure a snug, secure, "one-with-your-chair" feel.

Adjustable height fixed swivel anti-tip with 58mm fifth wheel for the quickest turns ever.

New head tube improvements reduce overall weight by 1 lb. and add precision components that maximize stiffness, reduce play and increase overall performance.

Options

- Adjustable Center-of-Gravity
- Spinergy® SLX or Spox wheels
- Sun® Equalizer™ wheels
- 12 tab pushrims
- Tapered seat width
- Welded seat rigidizer bars w/solid seat
- Double swivel anti-tip/5th wheel
- Click straps
- Double amputee front-end
- Recessed platform footrest
- Adjustable angle footrest
- Clamp-on fixed aluminum side guards
- Fixed side guards w/welded tube
- Fixed aluminum or carbon fiber side guards
- Titanium axles
- Titanium pushrims
- Front frame protectors
- Alignment gauge

Features

- Custom-built fixed frame in 7000 aluminum
- Adjustable height fixed swivel anti-tip with 58mm fifth wheel
- Fixed back w/fixed or adjustable height
- Adjustable tension seat and back upholstery
- Fixed axle position w/fixed wheelbase
- Fixed camber: 15°, 18° or 20°
- High performance Sun® wheels: 24", 25", 26" or 700C
- Anodized pushrims
- High pressure clincher tires
- Precision fork caster system and super hard 72mm casters
- Adjustable height footrest
- Powder coat paint
- Rear frame protector
- Nord lock bolt axle securing system

The Paul Schulte signature Chair shown with optional adjustable center-of-gravity.

"When you dream big and give it your all, special things happen."
